1. Product Overview

LAWCOLAB is a full-featured, multi-tenant **Legal Practice Management SaaS** platform built with Python/Flask and PostgreSQL. It gives law firms a single unified workspace to manage clients, cases, team members, invoices, calendars, communications, and payments — accessible from any device via a responsive web interface.

Designed for solo practitioners, growing firms, and multi-office enterprises, LAWCOLAB ships with four subscription tiers plus a white-label licensing option, a super-admin multi-tenancy layer, and a built-in sales & checkout system — everything needed to launch a legal-tech SaaS business out of the box.

Who Is It For?

- Law firm administrators who need to manage cases, clients, and team workflows
- Attorneys and paralegals tracking their assigned matters and deadlines
- Clients wanting real-time visibility into case progress and invoices
- Entrepreneurs looking to resell a white-label legal SaaS platform
- Developers wanting a production-ready Flask/PostgreSQL codebase to extend

Technology Stack

Component	Technology
Backend Framework	Python 3.11 · Flask 3.x
Database	PostgreSQL (via SQLAlchemy ORM)
Authentication	Flask-Login · Email/Password · Flask-Dance (OAuth)
Frontend	Bootstrap 5 · Jinja2 Templates · Vanilla JS
PDF Generation	WeasyPrint · ReportLab
Server	Gunicorn (WSGI)
Security	Flask-WTF (CSRF) · Werkzeug password hashing

2. Key Features

Multi-Tenant Law Firm Management

- Each law firm is fully isolated — admins see only their own firm's data
- Super Admin manages the entire platform from a separate control panel
- Firm branding, profile, and banking details configurable per tenant
- Trial period management with subscription gate on premium routes

Case & Project Management

- Create cases with title, description, status, priority, and deadline
- Status workflow: Active → In Progress → Completed → On Hold
- Priority levels: High / Medium / Low with colour-coded badges
- Assign multiple team members and clients to a single case
- Per-project file uploads with download management
- Project-level group chat thread for team collaboration

Client Management

- Full profiles: contact info, company, industry, website, headquarters
- Searchable, filterable client directory
- Client notes with timestamps (attorney work product)
- Link clients to multiple cases simultaneously
- Client portal: clients view their own cases, invoices, and team contacts

Team Management

- Add attorneys, paralegals, and support staff as Team Members
- Professional profiles: specialization, years of experience, education, certifications
- Team directory with role-based access control
- Assign team members to cases with automatic data scoping

Invoicing & Billing

- Create professional invoices with line items, quantities, rates, and descriptions
- Auto-calculated totals with configurable tax and discount support
- One-click PDF invoice generation (WeasyPrint/ReportLab)
- Invoice status workflow: Draft → Sent → Paid → Overdue
- Payment record tracking with method and reference number
- Revenue analytics dashboard: trends, outstanding balances, payment rates
- Invoice-specific chat channel for client billing queries
- Notification system for overdue invoice alerts

Calendar & Scheduling

- Create events: Court Date, Meeting, Appointment, Deadline, Reminder
- Month view and upcoming events view with colour coding
- Attendee management — invite team members and clients to events

- Notification badges for upcoming deadlines in navigation bar

Real-Time Chat & Support

- Team direct messaging and project group chat threads
- Client support chat with law firm team
- Super Admin monitors all firm support conversations
- Unread count badges in the navigation bar
- Invoice-specific billing chat channel

Escrow & Payment Processing

- Full escrow lifecycle: create, approve, and release milestones
- Multi-gateway: Bank Transfer, USDT, BTC crypto payments
- Bank transfer instructions with firm banking details on invoices
- Crypto wallet address display for client payments
- Payment evidence upload (screenshot / receipt) with admin review
- Escrow transaction logs and audit trail

Analytics Dashboard

- Total billed, collected, and outstanding revenue at a glance
- Project status distribution and pipeline metrics
- Invoice payment rate and overdue rate percentages
- Per-admin scoped to their law firm only

Public Firm Showcase

- Each law firm gets a public-facing profile page
- Display: firm name, logo, description, practice areas, contact info
- Client reviews and star ratings shown publicly
- Public contact/inquiry form — messages delivered to admin dashboard

Super Admin Control Panel

- Manage all registered law firms: view, verify, suspend
- Sales dashboard: leads, conversions, revenue by plan
- Monitor all support conversations across every firm
- Configure platform-wide pricing and popup settings
- Broadcast announcements to all firms

Sales & Subscription System

- Built-in pricing popup with configurable plans
- Lead capture and management: name, email, firm, plan chosen
- Checkout flow with payment method selection
- Payment evidence submission and admin approval workflow
- Subscription expiry enforcement with grace period
- Configurable trial duration (default 3 days free trial)

Dashboard Feature Sliders

- Admin-editable banner ads at the top of every user dashboard
- Upload custom background images or choose a solid colour
- Configurable: title, subtitle, description, CTA button text & link, icon
- Sort order, show/hide per slide without deleting
- 5 platform-default slides pre-seeded (Cases, Invoices, Chat, Calendar, Clients)
- Auto-advancing carousel with arrows and dot indicators

Document Management

- Per-project file upload with original filename preservation
- File listing with uploader name and upload timestamp
- Download any project file from the case detail page
- 16 MB per file limit (configurable)

Audit Logging

- Full audit trail for critical actions (user creation, status changes, payments)
- Timestamp, actor, action type, and target entity recorded
- Accessible from the Super Admin panel

3. User Roles & Permissions

Super Admin

Platform Owner

- Access all law firms, users, and data platform-wide
- Manage and verify law firm registrations
- Configure global pricing, popup settings, and sales tools
- View and respond to all support conversations
- View platform analytics and sales dashboard

Admin (Law Firm)

Law Firm Owner / Manager

- Full control over their own law firm tenant
- Add and manage clients, team members, and cases
- Create, send, and track invoices and payments
- Configure banking details and dashboard sliders
- View firm analytics and manage public showcase profile

Team Member

Attorney / Paralegal

- View and manage cases assigned to them
- Upload/download case documents and communicate via project chat
- View assigned client profiles and calendar
- Generate and manage invoices (where permitted by admin)

Client

Law Firm Client

- View their own assigned cases and case progress
- View and download their invoices
- Chat with their legal team via the client portal
- Submit support requests and view firm showcase

4. Pricing Plans

LAWCOLAB ships with a fully configurable pricing system. All prices are adjustable from the Super Admin Sales Dashboard without any code changes.

Plan	Price	Duration	Ideal For
3-Day Free Trial	FREE	3 days	Evaluation & testing — no credit card required
Starter	\$39	1 month	Solo lawyers & small practices (up to 5 team members)
Growth	\$90	3 months	Growing firms up to 20 team members
Enterprise	\$350	1 year	Large firms — unlimited users, white-label client portal
White-Label License	\$1,745	One-time lifetime	Resell as your own SaaS business forever

White-Label License includes: full source code ownership, self-hosting rights, ability to resell as your own SaaS product, 6-month white-glove setup & support, all future updates, and custom feature development at flexible rates.

5. Technical Stack & Requirements

Minimum Server Requirements

- Python 3.11+
- PostgreSQL 13+
- 512 MB RAM (1 GB recommended)
- 1 GB disk space (plus file storage)
- Linux / macOS / Windows with Python

Key Python Dependencies

Package	Purpose
Flask 3.x	Web framework and routing
Flask-SQLAlchemy	ORM and database abstraction layer
Flask-Login	User session and authentication management
Flask-WTF	CSRF protection and form handling
Flask-Dance	OAuth social login support
psycopg2-binary	PostgreSQL database driver
WeasyPrint	HTML-to-PDF invoice rendering
ReportLab	Programmatic PDF document generation
Gunicorn	Production WSGI HTTP server
Pillow	Image processing for file uploads
Werkzeug	WSGI utilities and password hashing
email-validator	Email address format validation

6. Installation & Configuration

Required Environment Variables

Variable	Description	Example
SESSION_SECRET	Flask session signing key (32+ random chars)	your-secret-here
DATABASE_URL	Full PostgreSQL connection string	postgresql://user:pass@host/db
PGHOST	PostgreSQL hostname	localhost
PGPORT	PostgreSQL port	5432
PGDATABASE	Database name	lawfirmos_db
PGUSER	Database username	lawfirmos_user
PGPASSWORD	Database password	*****

Quick Start Steps

- 1. Extract the source code to your server.
- 2. Install dependencies: `pip install -r requirements.txt`
- 3. Set environment variables (SESSION_SECRET, DATABASE_URL, PG*).
- 4. Run the app: `gunicorn --bind 0.0.0.0:5000 main:app`
- 5. Database tables are created automatically on first startup.
- 6. Create Super Admin: `python init_super_admin.py`
- 7. Log in at `/auth/login` with your super admin credentials.
- 8. From the Super Admin panel, create Law Firms and Admin users.
- 9. Log in as Law Firm Admin and add clients and team members.

Replit (One-Click Deployment)

LAWCOLAB runs natively on Replit. The PostgreSQL database is provisioned automatically. Set SESSION_SECRET in Replit Secrets, click Run, and the app is live instantly. The Gunicorn workflow is pre-configured in `.replit`.

7. Admin User Guide

Logging In

- Go to /auth/login and enter your email and password.
- Super Admins → Super Admin dashboard.
- Law Firm Admins → /admin/dashboard.
- Team Members and Clients see their respective dashboards.

Adding Clients

- Admin dropdown → Add Client.
- Enter: first name, last name, email, phone, company, industry.
- Set an initial password (clients should change this on first login).
- Assign the client to a case from the Projects module.

Adding Team Members

- Admin dropdown → Add Team Member.
- Enter professional details: name, email, specialization, experience.
- Set their login password and assign them to cases.

Creating Invoices

- Invoices → Create Invoice → select client, add line items.
- Totals are calculated automatically.
- Save as Draft or Send immediately.
- Download a professional PDF from the invoice detail page.
- Mark invoices Paid once payment is confirmed.

Managing Dashboard Sliders

- Admin dropdown → Dashboard Sliders.
- Click Add Slide to create a new feature banner.
- Upload a background image (recommended 1400×400 px) or choose a colour.
- Set title, subtitle, description, CTA button text and link.
- Choose a FontAwesome icon class (e.g. fas fa-briefcase).
- Set sort order (lower = appears first) and toggle active/inactive.

Managing Pricing (Super Admin)

- Super Admin → Sales Dashboard → Pricing Settings.
- Update plan prices — changes take effect immediately site-wide.
- White-label / founders price is configured here too.

Analytics

- Navigate to Analytics in the main navigation bar.
- View total revenue billed vs. collected and outstanding amounts.
- Review invoice payment rates, overdue percentages, and recent activity.

8. URL / Route Structure

Route	Description	Access
/auth/login	Email/password login	Public
/auth/signup	New account registration	Public
/pricing	Pricing plans page	Public
/	Homepage / landing page	Public
/admin/dashboard	Law firm admin dashboard	Admin
/admin/add-client	Add a new client	Admin
/admin/add-team-member	Add a new team member	Admin
/admin/manage-users	Manage all firm users	Admin
/admin/sliders	Dashboard slider management	Admin
/admin/firm-profile	Edit law firm profile	Admin
/admin/banking-settings	Configure payment/banking details	Admin
/projects/	Case / project list	All users
/projects/<id>	Case detail with files and chat	All users
/clients/	Client directory	Admin / Team
/invoices/	Invoice list	All users
/invoices/create	Create new invoice	Admin
/invoices/analytics	Revenue analytics dashboard	Admin / Team
/calendar/	Calendar view	All users
/enhanced-chat/support	Support chat interface	All users
/superadmin/dashboard	Super Admin control panel	Super Admin
/superadmin/lawfirms	All law firms listing	Super Admin
/sales/popup	Purchase / subscription popup	Public
/sales/checkout	Payment checkout flow	Public
/public/<firm_slug>	Public firm showcase profile	Public
/escrow/	Escrow transaction management	Admin

9. What's Included (CodeCanyon)

This purchase includes everything needed to deploy, configure, and extend LAWCOLAB.

Source Code

- Full Python/Flask backend: app.py, main.py, routes.py, all blueprints/
- SQLAlchemy models: models.py plus extended model files for payments and chat
- All blueprint files: auth, admin, dashboard, invoices, calendar, chat, sales, escrow, etc.
- Utility modules: decorators, trial access, CSRF handling
- Form definitions (Flask-WTF)

Frontend

- All Jinja2 HTML templates (60+ templates across feature modules)
- Custom CSS — clean professional design (simple.css)
- Static images and assets
- Responsive Bootstrap 5 layout with full mobile support

Database

- Full SQLAlchemy schema — all tables auto-created on startup
- Seeding scripts: init_super_admin.py, init_sales_data.py, init_payment_data.py
- PostgreSQL-compatible (SQLite works for local development)

Configuration & Deployment

- Procfile for Heroku/Railway deployment
- requirements.txt with all pinned dependencies
- env_template.txt listing all required environment variables
- RAILWAY_DEPLOY.md deployment guide
- Gunicorn-ready WSGI configuration (.replit workflow pre-configured)

Documentation

- This comprehensive PDF documentation (15 pages)
- Inline code comments throughout all major files
- replit.md project overview

10. Support & Updates

LAWCOLAB is actively maintained by **Taskdrip**, a software development studio specialising in legal technology and SaaS platforms.

Support Channels

- Email: info@lawcolab.com
- WhatsApp: available via the website contact page
- Built-in support chat within the platform (Admin → Support)
- YouTube tutorials: [@Taskdriper](#)
- Response time: within 24 hours on business days

Update Policy

- Regular platform updates delivered as new source code releases
- White-Label License holders receive all future updates at no cost
- Subscription plan users receive updates as part of their plan
- Security patches applied promptly for all active customers
- Custom feature requests available at flexible developer rates

Customisation Services

Need custom features? Taskdrip can build bespoke extensions — additional practice area modules, custom integrations (payment gateways, document signing, e-filing), dedicated deployment assistance, and full rebranding for white-label customers.
